

The Sydney 2017

Thoracic Ultrasound Workshop

23 FEBRUARY 2017

A Workshop for respiratory physicians, intensivists, cardiothoracic surgeons and advanced trainees to explore the principles and practices of bedside ultrasound as extension of thoracic clinical practice

Limited to
Twenty four
Participants

Venue: Liverpool Hospital
Ingham Institute Clinical Skills & Simulation Centre
Elizabeth Street, Liverpool. Sydney NSW, Australia

Liverpool Hospital

Liverpool Hospital has been operating continuously since the end of the eighteenth century. It was originally run as a hospital for soldiers and convicts, starting as a tent hospital in the 1790's. The first brick hospital was established in 1813 on a portion of land beside the Georges River. A larger stone hospital building was designed by Francis Greenway, built by convict labour and opened in 1825.

The Hospital is located in one of the fastest growing areas in the State, with more than one million people expected to reside in south western Sydney by 2018

Welcome

The course is specifically designed to up skill in-training and practicing thoracic clinicians with the essential skills of bedside thoracic ultrasound.

This course can be accredited towards a formal recognition of competency awarded by the Thoracic Society of Australia and New Zealand.

Liverpool Hospital has capacity for 857 beds, 23 operating rooms and 60 critical care beds, as well as a comprehensive ambulatory care centre and is home to the Ingham's Institute of Applied Medical Research.

With over 4500 staff, Liverpool Hospital campus is one of the biggest and busiest tertiary referral hospitals in Australia providing a comprehensive range of clinical specialities. We have a strong commitment to teaching and research across many disciplines.
